

CROSS COUNTRY MANUFACTURING

Engineered for today. Built for a lifetime.

402BXF SANDMAX

Cross Country Manufacturing's SandMax Trailer is built with steel-strength durability at aluminum-class weight. The payload advantage, without compromise.

Every pound of steel on this trailer is there for a reason. Nothing added for the sake of it. The result is a Hardox® hopper and stronger convex panel design that carries the load with confidence. The SandMax has a low-profile gate that keeps the center of gravity down, and electroplated components built to hold up against the elements.

Our SandMax trailer is manufactured using Hardox® 450 and 100,000 PSI hi-tensile steel. Engineered so no weight goes to waste.
